Tests

expectException and expectExceptionMessage

```php
<?php
use Application\User\Queries\ListUserQuery;
use Illuminate\Http\Request;
use Spatie\QueryBuilder\Exceptions\InvalidFilterQuery;
use Tests\TestCase;

class ListUserQueryTest extends TestCase
{
    /** @test */
    public function it_throws_an_exception_when_the_key_for_filtering_is_not_supported(): void
    {
        $this->expectException(InvalidFilterQuery::class);
        $this->expectExceptionMessage('Requested filter(s) `key_not_supported` are not allowed. Allowed filter(s) are `id, email, nickname`.');

        $request = new Request(['filter' => ['key_not_supported' => 'value is irrelevant']]);

        new ListUserQuery($request);
    }
}
```
